## APPSolve Company Overview

### Who are we?

APPSolve was founded in 2002 with the aim of providing the best Oracle E-Business technical resources in the market. We have established ourselves in the Southern African market over the past 10 years providing these niche services with consistent quality. Our client base spans most industries and our long term relationships with our clients shows that customer satisfaction and service excellence goes hand in hand.

The formidable team of technical resources working for APPSolve ensures that the service we deliver is world class. These services include Oracle DBA and Oracle Developer services as well as Oracle APPS DBA and Oracle APPS Developer services as well as O/S Administration services.

APPSolve has also recently expanded into Botswana where we deliver the same high level of quality services.

### Experienced Oracle DBA's & Developers

APPSolve has the most impressive team of Oracle Applications DBA's, Developers and O/S Administrators. The individual consultants are all specialists in their own right and each one is very proud of being part of the most exciting Oracle Applications technical consulting team in South Africa. The team has been built up over the years, each individual picked for their specific talent, drive, skill and passion.

APPSolve consultants have all been part of several implementations in South Africa and are highly sought after for their high quality and skill. APPSolve is also involved in several long term support contracts. These range from fully outsourced to having one or two critical specialists on a client site depending on the specific client need.

### Quality Consulting

Each client's specific needs are analyzed before assigning resources. This ensures that the client always gets the correct resource for their specific requirements. The end result is that our resources are deployed where they can add the most value, enjoy the challenges and provide the customer with excellent service.

### Services offered

APPSolve can provide value added services to any company that has an investment in Oracle software. APPSolve is currently involved in support contracts, new implementations, upgrades, platform migrations, RAC implementations, Linux and Sun Solaris.

#### Services offered:

- Daily support – E-Business Functional, Development and DBA and Operating System
- Upgrades
- Performance Tuning
- Database Health Check
- Workflow Health Check
- Backup and Recovery Services
- Emergency Support
- System Architect Services
- Platform Migrations
- Disaster Recovery services
- License Sales
- License Audit

### Software

APPSolve provides pre-packaged software solutions that add value to our customers' E-Business implementation. The software ranges from a Secure Transfer tool to Advanced Banking Integration. These products have a fantastic return on investment and huge benefits to our clients.

### Oracle Partner

APPSolve is a member of the Oracle Partner Network, on the Gold Partner level, one of very few Oracle partners that specialize in Oracle and Oracle products alone. APPSolve is the only Oracle Specialized Enterprise Linux partner in Africa.
